Quilt Path and Quilter's Creative Touch Extended-Width Design Cheat Sheet

· Select Pantograph Mode

· Set your safe area EXTRA WIDE - at least as wide as the default size of the design

· Select Basic, **NOT** Power Panto

· Select the extended-width pattern that you've already imported

· Choose Equal Center [middle selection in the heart column]

· Tap on the bottom Star button until wrapping is turned off [option on the left]

· Tap Pattern Height to input the default or desired pattern height

· Tap Pattern Width to input the default or desired pattern width to keep the aspect ratio consistent - *not* the quilt's dimensions

· Select the number of Rows you need to fill your safe area

· Select Total Width, this time entering the width needed for the quilt

· Optimize by removing all jump stitches
